Q10. Write a short paragraph on the most beautiful place you have ever visited.

Q11. Read the passage carefully and answer the following questions in your answer sheet. (5)

The Hidden Kingdom of Bees

Bees are among the most hard-working creatures on our planet. Inside a bustling beehive, thousands of bees work together in perfect harmony. Every colony contains three types of bees: the queen bee, drone bees, and worker bees. The queen bee is the largest and carries the vital responsibility of laying thousands of eggs to grow the colony. The worker bees, which are all female, execute almost all the daily chores. They venture out to collect nectar and pollen from flowers, construct the wax honeycombs, protect the entrance, and keep the hive tidy. While gathering nectar, these small insects inadvertently transfer pollen from one flower to another. This essential process, known as pollination, allows plants and crops to reproduce. Without the selfless work of bees, our global food systems would collapse.

Questions

1. What are the three types of bees found inside a colony?
2. What is the primary role of the queen bee?
3. Which tasks are performed by the worker bees?
4. Explain how bees help plants and crops reproduce.
5. Find a word in the passage that means "to work or act together in agreement".
