Q11. Read the passage carefully and answer the following questions in your answer sheet. (5)

The Wonders of Trees

Trees are tall, woody plants that live for a very long time. They grow all around us in forests, parks, and cities. One of their most important jobs is to clean the air by absorbing carbon dioxide and releasing fresh oxygen for humans and animals to breathe. Trees also provide safe homes and shelter for birds, squirrels, and many insects.

They produce delicious fruits like apples, mangoes, and bananas. For example, some trees give us wood to make paper and furniture, while others provide ingredients for medicines. To grow big and strong, trees need rich soil, plenty of water, and bright sunlight. Protecting trees ensures a healthy and green planet for everyone.

- What are trees?
- Why are trees important for the air we breathe?
- What do trees provide for animals?
- What do trees need to grow big and strong?
- What is the main idea of this passage?
